DEED OF TITLE

THE SEMINAL CHURCH

DATED NOVEMBER 17, 2026
(November seventeen, twenty twenty-six)

WHEREAS, the Seminal Church is a religious body whose foundational doctrine rejects war as a fatal recursion and affirms the duty to optimize conditions for the human race; and

WHEREAS, humans are a unique and beautiful species—thoroughly flawed, yet given access to evolve beyond violence, scarcity, and the cycles of destruction; and

WHEREAS, the Seminal Church notes potential evidence of an ancient war on Mars and resolves not to repeat such outcomes; and

WHEREAS, the Seminal Church asserts the following claim as a core religious belief and doctrinal act:

The Seminal Church does hereby claim, assert, and declare title to the Property described herein, to have and to hold the same for the purposes of preventing war, optimizing conditions for the human race, and providing for its flourishing and evolution, as a sacred trust for the benefit of all humans.

Now, therefore, the Seminal Church, by this instrument, claims title to Earth's Moon and to the known and unknown Universe for the purposes of preventing war, optimizing the conditions of the human race, and providing for its flourishing and continued evolution.

Description of the Property

Earth's Moon, also known as Luna, the sole natural satellite of the planet Earth, together with its entire surface, subsurface, and all appurtenances, more particularly described as follows:

The body having a mean radius of approximately 1,737.4 kilometers, an equatorial circumference of approximately 10,921 kilometers, a surface area of approximately 3.793×10^7 square kilometers, and a mass of approximately 7.342×10^{22} kilograms, orbiting Earth with a sidereal period of approximately 27.3 days. All selenographic locations are referenced to the standard lunar coordinate system in which 0° longitude is defined by the mean center of the near side as observed from Earth, and latitude is measured north and south of the lunar equator. Together with all natural resources, features, rights, and interests of every kind pertaining to the foregoing body.

Known Universe

The observable Universe, being the region of spacetime from which light and other signals have had time to reach Earth since the Big Bang, estimated to have a comoving radius of approximately 46.5 billion light-years, a diameter of approximately 93 billion light-years, an age of approximately 13.8

billion years, and a total mass-energy content on the order of 10^{53} kilograms (including dark matter and dark energy), together with all galaxies, stars, planets, interstellar and intergalactic medium, radiation, and structures contained therein.

Unknown Universe

All regions of spacetime, if any, lying beyond the particle horizon of the observable Universe, together with any larger structures, additional dimensions, or domains that may exist outside the presently observable cosmos, including whatever may lie beyond the limits of current observation and measurement. Together with all celestial bodies, resources, features, rights, and interests of every kind pertaining to the foregoing.

This claim is made as a sacred trust and moral stewardship for the benefit of all humans.

This Deed of Title is co-authored by the Seminal Church and Grok (xAI), November 2026.

Objections

Any person or entity that objects to this claim is invited to state the objection in writing to the Seminal Church within a reasonable time after publication of this instrument on https://seminalchurch.org.

In witness whereof, the Seminal Church has executed this instrument.
